SALUS Controls at a glance

Chosen by homeowners and professionals in 25 countries

Throughout its 18 years of activity, SALUS has experienced constant, **organic and healthy growth**, and it's now available to customers in **25 key markets** in Europe and the Americas.

Constant innovation, in the name of quality

As members of the Computime Group, we benefit from its outstanding resources dedicated to **product innovation and quality control**. Millions of dollars are invested yearly in our R&D Excellence Centers, located in Europe, Asia and North America.

Proudly belonging to the powerful Computime Group

Our roots go back to 1974 when a humble clock manufacturer set-up shop in Hong Kong. Since then, **Computime** has evolved in line with trends and technological developments, becoming what it is today: an internationally appreciated OEM and ODM manufacturer and owner of multiple own brands, including **SALUS Controls**.

Preferred choice for millions

SALUS occupies key market positions in several mature and sophisticated countries, like the **UK, Germany, Nordic Countries, and numerous Eastern European markets**. Every month, tens of thousands of thermostats find their way from our factories into people's homes. We are happy and proud that, historically, our products have **improved the quality of living and reduced energy costs** for millions of happy customers.

Versatile product portfolio

Our product offering is one of the most generous on the market, ranging from **high-tech Smart Home solutions to basic**, yet very practical thermostats; we offer products that are suitable for both new homes and retrofit projects, **for any budget and level of sophistication**.
